

# HandleBar

Protect Your Hands.  
Extend Your Career.

## When you need true grip and power.

Athletes are prime physical specimens and large muscle groups can be difficult to treat with manual therapy or small instruments alone.

Enter the **handlebar**. Designed to treat areas ranging from the shoulders to the hamstrings, the handlebar gives you the balance and power to optimize treatment on these large muscle groups and save the wear and tear on the hands of athletic trainers.

"The players I treat love and appreciate HawkGrips as much as I do."

**Steve Smith**, PT, DPT, SCS, CSCS  
Director of Sports Science  
Washington Wizards

## When absolute peak performance matters

"HawkGrips has the superior product on the market for instrument assisted soft tissue mobilization. Comfortable, durable, and easy-to-use tools, accompanied with great product education and amazing customer service makes HawkGrips tough to beat."

**Sue Falsone**, PT, MS, SCS, ATC, CSCS, COMT, RYT®  
First Female Head Athletic Trainer in Pro Sports  
Former Head Athletic Trainer for the L.A. Dodgers
