SQUEGG™

SQUEGG
SMART DYNAMOMETER & HAND GRIP TRAINER

Squegg assesses and monitors grip strength using a smart, gamified platform that follows ASHT guidelines. It features a Bluetooth-connected dynamometer for reliable, remote assessments and personalized exercises. Compare performance to benchmarks, set goals, and track progress. Enhance rehab engagement and compliance with customizable routines and in-app reminders.

Key Features:

- Innovative technology for grip/pinch assessments, designed by therapists
- Portable and convenient, easy to use in clinic or at home, anytime
- Deliver in-person or remote care through engaging games and activities
- FDA medical device clearance and HIPAA Compliant
